

December 15, 2016

To Whom It May Concern:

Our program, Mount Wachusett Community College Educational Talent Search Program, was treated to a presentation by Brian Miller on November 2, 2016 at our 7th Grade Leadership Conference. Part of my responsibility for the day was to organize the entertainment for the conference. It was a challenge to find the right person or act that would be skilled at luring in one hundred and fifty 7th grade students, while at the same time instilling the message of leadership to their self, their peers and their communities.

The Internet is an invaluable tool when searching for information, yet there is a risk in trusting the information that is given. I was fortunate to find Brian Miller Speaks through an Internet search. I was impressed with his talent after watching his YouTube performances and reading the testimonials from other organizations that have hired him. Brian traditionally performed for high school students and adults. The final selling point was Brian's willingness to adapt his presentation towards middle school students.

Our students and staff raved about Brian's performance long after the day of his visit. He succeeded in entertaining the children and sliding our leadership message in at the same time. In addition, Brian took the time to visit with the students afterwards; answering questions, signing autographs and taking pictures.

I would recommend Brian Miller Speaks as a motivational speaker to schools, organizations and the business community. I guarantee you will leave feeling inspired and re-energized.

Sincerely,

Christine Binkunski
Program Advisor
North Central MA Talent Search Program
